

Handheld 160 kV X-ray imager – multi-modal penetration in a portable form factor.

KEY BENEFITS

- › Portable handheld – deploy anywhere
- › 160 kV penetrating power with image clarity
- › Multi-modal imaging in a compact package
- › Rapid explosives & contraband detection
- › Real-time image analysis for field operations

ABOUT

The RAVEN 160 kV is a compact handheld X-ray imager for portable security screening. Multi-modal imaging detects contraband, explosives and threats in baggage, cargo and personal-items inspection – with real-time analysis that supports EOD, law-enforcement and border operations in the field.

KEY FEATURES

- 160 kV X-ray generation
- Multi-modal imaging technology
- Handheld form factor for field deployment
- Real-time imaging and analysis
- Material discrimination capabilities
