About the JANUS®

JANUS® is an ultrabroadband security scanner for passenger and access-control screening. Elliptically shaped static transducer arrays use localised electromagnetic waves to detect metal, ceramic and explosive threats. An open and luminous inspection area is wheelchair accessible with the narrowest footprint in its class.

KEY BENEFITS

- › Detects metal, ceramic and explosive threats
- › Open, wheelchair-accessible archway with narrowest footprint
- › High throughput – two-operator screening
- › No moving parts – high redundancy and reliability
- › ECAC CEP, UK DfT and STAC certified

WHO IT'S FOR

Airports, national border control, high-security facilities

FEATURES

Complete feature list

- Static elliptical transducer arrays
